

Your choice, simplified.

The CalPERS 457 Plan is a voluntary savings program that allows you to easily defer any amount, subject to annual limits, through payroll deduction of contributions. The Plan is designed with your future retirement income needs in mind. The CalPERS 457 Plan offers participants:

- Services and investments at a reasonable cost using a simple fee schedule.
- A pre-tax retirement savings vehicle where contributions and earnings can benefit from the power of tax-deferral.
- A Roth after-tax contribution option (if the Roth plan feature has been adopted by your employer).
- A simplified approach to investing
- Access to financial learning resources, provided by Voya Institutional Plan Services, LLC.

The Plan also features CalPERS 457 Account Managers who are experienced retirement educators that are available to help you define your retirement goals and integrate them with your existing defined benefit planning. **Your Account Manager is able to meet with you at no additional cost.**

Meet **David Vallerga**, your CalPERS 457 Account Manager.

David has been a part of the CalPERS 457 field education team for more than 2 years and in the financial services industry for 15 years. He has primarily focused on servicing 457(b) deferred compensation programs for the last 12 years. David has both an insurance (California License #0F10956) and securities (FINRA Series 7 and 65) licenses, as well as an active Certified Retirement Counselor (CRC®) designation. When time permits, David enjoys mountain biking with his children and spending family time at the lake. He is passionate about helping people learn more about the benefits of saving for retirement, enrolling in the CalPERS 457 Plan, and establishing their own retirement savings strategy. Your journey to retirement begins with you, and David is here to help you along the way!
