Dear Shasta County Planning Commission,

As a construction worker in Northern California, I am writing in strong support of the Fountain Wind Project. This project will employ hundreds of construction workers right here in Shasta County, creating apprenticeship opportunities for North State residents. I appreciate the concerns that have been raised by the project opponents, but I believe the project applicants have addressed them. This process has been very transparent and engaging, and I credit the project applicant and Shasta County Staff for their work in making that a reality. On behalf of myself and my family, I encourage you to do what the majority of Shasta County residents are asking for: approve this project as presented.

Regards,
Chuck Gilliam

Dear Director Hellman,

I am hoping to see the completion of the Fountain Wind project here in Shasta County, and I hope you are as well. As I am sure you know, wind energy is much less expensive and extremely environmentally friendly compared to non-renewable energy sources. Using energy sources that emit greenhouse gases is a thing of the past, and we must get on board with renewables before we fall behind.

Plus, the revenue it would bring to the county would allow us to fund more projects in the future. Revenue that we can reinvest back into our county should always be considered a win.

The ball is in your court, and with your approval, Shasta County can expand our renewable energy infrastructure and also reap the economic benefits of such a beneficial project.

Sincerely,

Lewis Robinson

Dear Director Hellman,

I want to see real change in Shasta County, starting with building renewable energy infrastructure that will benefit our environment, our community and our economy. The rest of the state is moving toward renewable energy in order to meet our sustainable energy goals for California, and we need to keep up. We cannot stand by and let a project as great as Fountain Wind pass by us. We must act now. Wind energy will lower CO2 emissions drastically, which will have a huge positive impact on the environment. Please join me in supporting Fountain Wind and bring wind energy to Shasta County. It is the right thing to do.

Sincerely,

Dear Director Hellman,

Fountain Wind comes at a critical moment for both our state and our county. California has set a goal of being carbon-free by 2045 and required that at least 60% of electricity generated in the state be from renewable sources. I'd love to see Shasta County lead the way in achieving this by approving the Fountain Wind Project and providing our region and state with zero-emission renewable energy.

As for Shasta County, we need new jobs in new, relevant industries. This project will provide 200 construction jobs and 12 full-time jobs during operation. Fountain is a legitimate career opportunity for many of our residents. Plus the revenue the project will generate for our county is unbeatable. Just the \$50 million in property tax alone is enough reason to say yes.

I fully support wind energy and this project coming to Shasta County.

Sincerely,

Debra Moore

Dear Director Hellman,

I am writing to you today to share my thoughts about the proposed wind farm coming to Shasta County. As I hope you know, wind energy is the best renewable energy source as it does not emit any greenhouse house emissions and is extremely cost-effective. The Fountain Wind project is a solid investment into our environment and our community. The added energy generation will reduce the likelihood of blackouts, like the one we saw in August 2020, and it will be clean energy at that. Not to mention all the additional tax revenue our community will see during and after the construction of the wind farm. To be exact, we will get \$3.5 million in sales tax revenue during construction, \$50 million in property tax revenue over 30 years after construction and an additional \$1 million in community benefit programs. This is a huge sum of money that can be put into many great places, like improving local infrastructure and education.

Please allow for all the wonderful benefits of the Fountain Wind project, and give it your full support.

Sincerely,

Jim Halter

Dear Director Hellman,

I would like to see the approval of the Fountain Wind Project here in Shasta County. It is going to bring substantial benefits to our county and our state, and it is an opportunity we cannot let slip by us.

Beginning with the economic benefits, this project is going to bring 200 jobs during construction that will directly benefit members of our community. After the project is completed, there will be 12 full-time positions available for our community members as well. Job creation is always something we should be doing, and this is the perfect opportunity to bring reliable, well-paying jobs to the community.

Next is the positive environmental impact. This project is proposed to bring clean wind energy that will supply power to over 86,000 homes throughout the state. I want to see more of a transition to clean energy, and this is just the project to do that.

Please support this project and support clean energy.

Sincerely,

Subject: Don't pass up jobs from Fountain

⚠ EXTERNAL SENDER: Do not follow links or open attachments unless you recognize the sender and know the content is safe.

Dear Director Hellman,

The jobs that come with the proposed wind farm for Shasta County should not be passed up.

So many of our skilled residents were laid off as a result of COVID-19, and the Fountain Wind project could provide them with a relevant new industry to be a part of.

The project offers 200 jobs during construction, and 12 full-time during operation-all of which local folks will take priority when applying. This number of jobs doesn't come to a rural community like ours all that often.

Fountain is the perfect opportunity to reduce our unemployment rate and provide new opportunities here in Shasta County.

For the sake of working families, approve Fountain Wind.

Sincerely,

Kenneth Howes

 **EXTERNAL SENDER:** Do not follow links or open attachments unless you recognize the sender and know the content is safe.

Dear Director Hellman,

We need another source of energy in the grid, and we really need more jobs. This project would prevent more blackouts from occurring this summer. I know I'm not the only one who wants to avoid those. A backup source of power for our county in the form of wind energy is a major safety precaution I encourage us to take. Plus it offers 200 jobs during the construction phase and 12 full-time jobs during operation. As so many folks have been laid off due to the pandemic, Fountain could be just the right opportunity for hundreds of residents.

I see Fountain as a very positive project for our community, and I hope you agree.

Subject: Fountain Wind is in our best interest

 **EXTERNAL SENDER:** Do not follow links or open attachments unless you recognize the sender and know the content is safe.

Dear Director Hellman,

The facts of the proposed wind farm for Shasta County make it a pretty desirable project.

Foremost, the added generation capacity from the wind farm will help us be better protected from PG&E blackouts, like the one we experienced in August of 2020 and I'm sure never want to live through again.

Next, \$35 million in property tax revenue for the next 30 years and \$3.5 million in sales tax revenue during the project's construction. This type of money cannot be passed up right now.

And lastly the public health benefits from the project. As a renewable source, wind energy reduces harmful air pollutants emissions that contribute to chronic illness and premature death.

Fountain adds up to be in the best interest of our community and we should all get behind it.

Sincerely,

Subject: I Support the Fountain Wind Project

 EXTERNAL SENDER: Do not follow links or open attachments unless you recognize the sender and know the content is safe.

Dear Director Hellman,

I am writing today to express my support for the Fountain Wind Project currently under development in northeastern Shasta County. The Fountain Wind Project will provide many local benefits, including enhanced sustainable forestry practices, while increasing fire safety measures and producing new tax revenues throughout the life of the project, totaling \$50 million. The increased tax revenues provided by the Fountain Wind Project will not only greatly help taxpayers and our county address the increasing tax burden, they can be used to fund local infrastructure and other vital public services, benefitting all residents.

Further, the Fountain Wind Project will support hundreds of family-wage construction jobs to construct the project and up to 12 permanent jobs to operate and maintain the wind project day to day. These are jobs that can help retain young people in Shasta County and the surrounding area by offering them a broader range of well-paying employment opportunities. We have many local businesses in the area who could also benefit from a project like the Fountain Wind Project, as there will be many needs for local equipment and services throughout construction and project operations. We need to look forward, not backwards, and support this rare opportunity that will help our community thrive today and for future generations.

Sincerely,

Dear Director Hellman,

It would be a shame to see the proposed wind farm delayed or voted down because of the few residents who refuse to acknowledge its benefits. Living here for years now, I fully understand what the revenue and jobs from Fountain could do for our area, especially after the year we've had. The County could finally take on new community projects with the millions in revenue Fountain will generate for it, and residents will be able to find new career opportunities from the hundred plus jobs Fountain is offering up. Fountain is really integral in overcoming the recent economic difficulties-and it should be approved without hesitation. Join the sensible residents who want positive change in Shasta County, and vote yes on Fountain Wind.

As a construction worker in Northern California, I am writing in strong support of the Fountain Wind Project. This project will employ hundreds of construction workers right here in Shasta County, creating apprenticeship opportunities for North State residents. I appreciate the concerns that have been raised by the project opponents, but I believe the project applicants have addressed them. This process has been very transparent and engaging, and I credit the project applicant and Shasta County Staff for their work in making that a reality. On behalf of myself and my family, I encourage you to do what the majority of Shasta County residents are asking for: approve this project as presented.

As a construction worker in Northern California, I am writing in strong support of the Fountain Wind Project. This project will employ hundreds of construction workers right here in Shasta County, creating apprenticeship opportunities for North State residents. I appreciate the concerns that have been raised by the project opponents, but I believe the project applicants have addressed them. This process has been very transparent and engaging, and I credit the project applicant and Shasta County Staff for their work in making that a reality. On behalf of myself and my family, I encourage you to do what the majority of Shasta County residents are asking for: approve this project as presented.

As a construction worker in Northern California, I am writing in strong support of the Fountain Wind Project. This project will employ hundreds of construction workers right here in Shasta County, creating apprenticeship opportunities for North State residents. I appreciate the concerns that have been raised by the project opponents, but I believe the project applicants have addressed them. This process has been very transparent and engaging, and I credit the project applicant and Shasta County Staff for their work in making that a reality. On behalf of myself and my family, I encourage you to do what the majority of Shasta County residents are asking for: approve this project as presented.

Regards,
Davi Joseph

Dear Shasta County Planning Commission,

As a construction worker in Northern California, I am writing in strong support of the Fountain Wind Project. This project will employ hundreds of construction workers right here in Shasta County, creating apprenticeship opportunities for North State residents. I appreciate the concerns that have been raised by the project opponents, but I believe the project applicants have addressed them. This process has been very transparent and engaging, and I credit the project applicant and Shasta County Staff for their work in making that a reality. On behalf of myself and my family, I encourage you to do what the majority of Shasta County residents are asking for: approve this project as presented.

Dear Shasta County Planning Commission,

As a construction worker in Northern California, I am writing in strong support of the Fountain Wind Project. This project will employ hundreds of construction workers right here in Shasta County, creating apprenticeship opportunities for North State residents. I appreciate the concerns that have been raised by the project opponents, but I believe that those concerns have been adequately addressed. This process has been very transparent and engaging, and I credit the project applicant and Shasta County Staff for their work in making that a reality. On behalf of myself and my family, I encourage you to do what the majority of Shasta County residents are asking for: approve this project as presented.

⚠ EXTERNAL SENDER: Do not follow links or open attachments unless you recognize the sender and know the content is safe.

Dear Director Hellman,

Right now, our county lacks necessary revenue. Residents are struggling to find jobs. And new industries are not choosing Shasta County.

Fountain Wind changes all of that.

By approving this wind farm, you are helping us dig out of a recession. You are giving the county a \$50 million revenue stream for the next 30 years and residents over 200 good job opportunities. Plus, you are indicating to other private companies that Shasta County is a business-friendly place to operate.

I am totally in favor of this project and believe it's illogical not to be. We've got to realize our financial reality and make the decisions that will improve it. Passing Fountain Wind is one of them.

Sincerely,

Natalie Campos

⚠ EXTERNAL SENDER: Do not follow links or open attachments unless you recognize the sender and know the content is safe.

Dear Director Hellman,

Please accept this message as a sign of support for the proposed Fountain Wind Project. When I heard that there is some opposition to bringing more wind to Shasta County, I felt that I should write to you to express my public support. It is important to invest in sustainable energy projects like this one to ensure a healthy, sustainable future for generations to come. Wind energy is not only a clean energy source as it does not pollute the air, but it is also renewable! Wind is free, and we should harness it to power our homes. And harnessing wind energy is extremely cost effective because of the low operating costs.

It is so obvious to me that we should be investing in sustainable energy projects like Fountain, and I hope you feel the same. Please join me in supporting this project by voting yes to Fountain Wind.

Sincerely,

Dear Director Hellman,

The proposed wind project coming to our county, Fountain Wind, is a great deal for us. I hope you are giving it your full support. The economic benefits alone should be reason enough to support such an impactful project. This project will bring more than 200 jobs, stimulating our economy when we need it most. This past year has been hard on everyone in some way, shape or form, so I ask that you do what you can to make sure our economic future is as strong as it can be.

Please say yes to Fountain Wind for a strong economic future for our county.

Dear Director Hellman,

Environmentally speaking, we cannot continue to rely on energy sources that emit greenhouse gases. The Fountain Wind Project is an opportunity Shasta County cannot pass up. It is a chance to bring more renewable energy to the county and the state. By approving this wind project in our county, we will be contributing to reaching California's renewable energy goals, and keeping our air clean and our land pristine.

Please make the choice that will be for the greater good for future generations. Approving the Fountain Wind project will ensure a healthy environment now and into the future. Please give it your yes vote.

⚠ EXTERNAL SENDER: Do not follow links or open attachments unless you recognize the sender and know the content is safe.

Dear Director Hellman,

I am in favor of the Fountain Wind Project. Now more than ever, Shasta County could use the revenue and jobs it will provide.

The project offers a long-term economic backbone to our county. The \$50 million in property taxes generated will be given to us for over 30 years, and the \$35 million in sales tax will come immediately during construction. This a terrific deal for our current and future financial position.

With the loss of jobs we've experienced this year, the 200 construction jobs and 12-full time Fountain Wind promises are excellent opportunities for our residents. Renewable energy is a relevant industry that offers meaningful work experience and could propel many folks into a successful career path.

Fountain Wind means economic relief for our county. Residents here are depending on it. Please say yes.

Dear Director Hellman,

The Fountain Wind Project is a consequential project for Shasta County and for our state. We all know that there is an increasing push to move towards cleaner forms of energy, and this project is a chance for Shasta County to make forward strides with the rest of the state to ensure a greener, more sustainable future. This wind farm will not only contribute to reducing harmful emissions that damage our environment but also harmful emissions that contribute to chronic illness and premature death.

I urge you to please look at the facts. Approving more wind energy in Shasta County is a great sustainable option for energy for the state. It is cost-effective and it creates jobs for the area. We can rely on energy that is generated domestically and utilize the resources that are readily available to us.

Please vote yes on the Fountain Wind project.

Dear Director Hellman,

I am a proud supporter of renewable energy, and Shasta County needs to take this opportunity to bring wind energy to the county in order to contribute to the state's renewable energy goals. This will not only be good for our environment, but good for the community as well. The Fountain Wind Project is going to bring an enormous amount of revenue to our economy, and in times like these we need to take advantage of opportunities like this.

The project will generate more than \$50 million in tax revenue and plans on creating over 200 jobs. These are jobs that our community would not see without this project. With the increase in jobs and tax revenue, there will be more money circulating in our local economy, helping our local businesses.

I am asking you to please look at the facts. This project is the helping hand we need for our economy. Please make the smart choice to set up Shasta County for a secure future with renewable wind energy. Say yes to the Fountain Wind Project.

Sincerely,

Deziree Gilbert
